

# *Planmeca Romexis goes Apple*

*Planmeca Romexis software is now compatible with Apple, thanks to which all Planmeca X-ray imaging equipment at the dental office are available in a Mac OS environment. All Planmeca X-ray models feature full Mac OS support, and the 2D and 3D images can be sent to an iPhone and iPad for diagnosis.*

**New!**

**PLANMECA**

### FULL MAC OS SUPPORT FOR ALL PLANMECA X-RAY MODELS

All Planmeca's X-ray units are fully compatible with Mac OS, including panoramic, intraoral, and 3D CBVT images. Whichever the diagnostic requirement, the images can be acquired, viewed, processed, and stored in a Mac OS environment.

### IPHONE & IPAD COMPATIBILITY

- Accurate view for analysing details
- View, rotate, and zoom images, and measure distances
- Send images by simply clicking the *Send image to iPhone* button on Planmeca Romexis
- Based on OsiriX Mobile application
